

## *ACKNOWLEDGMENT*

*Before and above all, I thank and pray for Allah for explicitly known and uncountable reasons.*

*I would like to express my best thank to my first advisor, Prof. Dr. rer. nat. R. Zölitz-Möller for his guide and encouragement during these years at Greifswald University. He offered me excellent guidance and useful ideas without which this study would not have completed.*

*I would like to express my best thank to the Arab Noble Scientist Prof. Farouk El-Baz my aboard advisor for his guide and encouragement during my study.*

*I am indebted to Prof. M. A. Abdel Moati and Prof. Z. A. Rizk for their endless help, scientific cooperation, continuous advice and support by themselves to get this work in best form.*

*I owe a lot of gratitude to Prof. Hassan Garamoon for his supports during the time of the data collection and his valuable guides into hydro-geochemistry studies.*

*My gratitude is due to Prof. Dr. rer. nat. A. M. Ebraheem and Dipl Geo. Jörg Hartleib for their spirit encouragement and sharing some of their enormous GIS experience and computer skills with me.*

*Special thanks and appreciation to my big brother Prof. Dr Omer Attef and my friend Priv.-Doz. Dr. Thomas Jira for opening the door to me to join Greifswald University.*

*Last but certainly not least, I am grateful to my father, mother, sister, brother, my wife, my lovely son and my all family, for their unlimited support, help, patience and encouragement through this work. Without their great supports on spirit and time, I would not have done this study in time.*

*Greifswald, March 2010.*
