

Vegetation Tables

Phytosociological relevés

The cells contain the cover value of every plant species after transformation by van der Maarel of Braun-Blanquet values <5%. Cover values >5% have been directly estimated in the field.

Transect Relevés

The cells contain cover values following Braun-Blanquet values <5%. Cover values >5% have been directly estimated in the field. When there is a "_" in front of a number it means that it is not a cover value, but a count of individuals.
