

Legend for Dendrogram from TWINSpan

1. The sample plots have a code corresponding to their study area (= Letter), disturbance status (= First numeric) and exposition (= Third numeric). An exception are the sample plots from the Diploma Thesis (all from Pantelleria), which show only three numeric positions in total.

2. The codes mean:

L = Aeolian Islands

P = Pantelleria

E = Mt. Etna

M = Palermo Mts.

I = Hyblaean Plateau

7 = undisturbed (incl. still cultivated)

8 = burnt

9 = grazed

5 = North-facing slopes

6 = South-facing slopes
